

Fabric Envisioning Solution

Dive into the capabilities of Fabric with a trusted approach

The Problem

Many clients either have a large Power BI footprint and are not aware or comfortable with its evolution to Fabric, are having trouble utilizing its vast capabilities, or have other data products and want to explore Fabric as a solution and its benefits. Whatever the case is, we often see clients needing assistance with the various challenges that arise in their Fabric journey and the evolution of Power BI.

The Solution

Our approach follows Microsoft's Cloud-Scale Analytics & Adoption Methodology, and the first phase in the process begins with Envisioning. During our engagement, we envision Fabric across all dimensions of roll out including, Strategy & Vision, Governance, Roles and Responsibilities, Delivery Models, Service Management, Security, Support, Adoption, and Culture.

Our envisioning offer provides a hands-on "Fabric-in-a-Day" agenda and puts you in the pilot seat to build your first Fabric Solution, understand licensing options and capabilities, high level governance approaches and seeing the way forward with Fabric.

Agenda

- Week 1: Envisioning Workshop, Use-Case Review, Data Model Input: Includes IT, Security and Compliance, Business Users, Initiative Sponsor Team.
- Week 2: Workspace config, Fabric Solution in a Day, and initial strategy review. Knowledge Sessions, Workload Review, Ad-Hoc Q&A
- Week 3: Fabric Envisioning Report, Review & Next Steps.

Spyglass MTG Can Help!
