

Continuous Analytics Delivery

Make Informed Decisions and Fulfill Business Needs with Targeted Data

The Problem

Organizations have a lot of disparate data at their disposal and need to harness it in useable and effective analytics solutions to make more informed business decisions. However, many companies often get bogged down with large Data Warehouse projects that don't deliver results in a timely manner to business users.

The Solution

Spyglass created an offer that delivers targeted data marts to fulfill specific business area needs and answer specific business area questions. This offer can either compliment or follow our Data Platform in 30 Days (DPi30) solution for an even greater data platform. These business questions that we aim to answer with this offer are ones that may previously have been unattainable. Our solution also facilitates user exploration of data to discover new patterns in the data.

Deliverables:

- Fully realized logical ODS and Dimensional models
- Physical DDL to be used to create actual structures
- Source-to-target mapping documents to facilitate loading physical structures
- Transformation documentation
- Data lineage documentation
- Data Governance decisions document

We break our process out into initial Global Tasks for the entire organization and then switch over to Subject Area Tasks to focus on specific business areas.

Benefits of a Subject Area Approach:

- Ingest smaller areas of data to facilitate specific business areas
- Quicker development times
- Continually delivering value to customers
- No waiting for large data warehouses

Spyglass MTG Can Help!

We can help you make informed decisions and fulfill business needs with targeted data. [Contact us today!](#)

About Spyglass MTG- A Women Owned/Women Led Company

For over 15 years, we've closely partnered with Microsoft to bring their vast and expanding suite of enterprise solutions to our clients. We leverage proven methodologies, migration tools and expert consultants to architect, build, deploy, migrate to, and manage Microsoft solutions. Whether you are deploying or upgrading M365, implementing Azure, deploying Teams, building a SharePoint Site, developing a Security or Governance Model, designing a Modern Warehouse or BI Solution, or developing AI apps on the Power Platform, we can help!
