

Microsoft Purview M365

Provide a jumpstart to your data governance foundation across your enterprise data assets

The Problem

Many organizations have started their data governance journey by developing individual solutions that cater to specific requirements of isolated groups and data domains across the organization. Although experiences may vary depending on the industry, product, and culture, most organizations find it difficult to maintain consistent controls and policies for these types of solutions.

The Solution

Spyglass's Microsoft Purview M365 offering is a Minimum Viable Product (MVP) implementation of Microsoft 365 (M365) components of Purview to provide a jumpstart to your data governance foundation across your enterprise data assets. This offering focuses on establishing the foundational components for data governance within the M365 environment to help secure, monitor, and take actions on corporate data.

Components Covered:

- Data Loss Prevention (DLP)
- Retention Labels & Policies
- Sensitivity Labels
- Custom Sensitive Information Types
- On-Premises SMB File sharing scanning
- Auto-labelling

We work with you to build a well-planned deployment of a data governance implementation that can:

- Maximizing the business value of your data
- Increase collaboration
- Protect data even when it leaves the corporate environment
- Decrease time to discover data
- Reduce time-to-market
- Reduce operational risks

Spyglass MTG Can Help!

We can help you jumpstart your data governance foundation with Microsoft 365 & Purview. [Contact us today!](#)

About Spyglass MTG- A Women Owned/Women Led Company

For over 15 years, we've closely partnered with Microsoft to bring their vast and expanding suite of enterprise solutions to our clients. We leverage proven methodologies, migration tools and expert consultants to architect, build, deploy, migrate to, and manage Microsoft solutions. Whether you are deploying or upgrading M365, implementing Azure, deploying Teams, building a SharePoint Site, developing a Security or Governance Model, designing a Modern Warehouse or BI Solution, or developing AI apps on the Power Platform, we can help!
