

Data Governance Foundation: Azure Purview MVP

Jumpstart your data governance with automated data discovery, classification, and end-to-end data lineage

The Problem

Many organizations have started their data governance journey by developing individual solutions that cater to specific requirements of isolated groups and data domains across the organization. Although experiences may vary depending on the industry, product, and culture, most organizations find it difficult to maintain consistent controls and policies for these types of solutions.

The Solution

Spyglass's Azure Purview MVP offering is a 10-week minimum viable product (MVP) implementation of Azure Purview to provide a jumpstart to your data governance foundation across your enterprise data assets.

Spyglass's Jumpstart Governance offering focuses on establishing the foundation for data governance with Azure Purview to tackle key governance scenarios and capabilities such as aligned glossary terms, search, and browse. We will conduct in-depth requirement sessions for each business unit or group to cover specific end-to-end scenarios such as lineage from on-premises cloud to Power BI sources and develop a holistic governance strategy access roadmap.

The Outcomes

- Enabling a data governance platform and culture where data consumers can easily find, interpret, and trust data
- Increasing collaboration amongst various business units to provide a consistent data experience
- Fostering innovation by accelerating data analytics to reap the benefits of the cloud
- Decreasing time to discover data through self-service options for various skill groups
- Reducing time-to-market for the delivery of analytics solutions that improve service to their customers
- Reducing the operational risks that are due to the use of domain-specific tools and unsupported technology

Spyglass MTG Can Help!

About Spyglass MTG- A Women Owned/Women Led Company

For over 15 years, we've closely partnered with Microsoft to bring their vast and expanding suite of enterprise solutions to our clients. We leverage proven methodologies, migration tools and expert consultants to architect, build, deploy, migrate to, and manage Microsoft solutions. Whether you are deploying or upgrading M365, implementing Azure, deploying Teams, building a SharePoint Site, developing a Security or Governance Model, designing a Modern Warehouse or BI Solution, or developing AI apps on the Power Platform, we can help!

Timeline

- Stage 1: Initiation (Week 1)
- Stage 2: Implementation & Deployment (Week 1-9)
 - Phase 1: Design & Assessment (Week 1-3)
 - Phase 2: Build and Deploy (Week 3-8)
 - Phase 3: Envision Complete Governance
- Stage 3: Closure (Week 9-10)

Final Deliverables

- Technical Documentation
- Production Implementation Design
- End-to-End Governance Roadmap
- Purview MVP Implementation & Configuration
