

## The Move from Netezza to Azure

The Journey from Outdated IBM Netezza to the Cloud with Azure Data Platform

### The Problem

Are you still running your data analytics on Netezza or IBM data warehouse appliance?

*Netezza is outdated technology and end-of-life!*

Netezza is no longer suited for the economies of scale of today's cloud first data world. IBM's decision to end support for Netezza acknowledges this and we've seen many customers who are kicking outdated platforms to the curb.

### The Solution

Netezza 'was' the right solution for your business analytics and migrating to Azure Data Platform is the right solution now!

We know moving to a new platform isn't easy and if you adopted Netezza, there's a good chance your business depended on Netezza for critical data analysis. Moving off Netezza is far more than a simple transfer of data to the cloud. It requires selection of a new platform, a migration strategy, security planning, application and process migration and more.

It's an overwhelming topic to say the least. As you consider your options for moving beyond Netezza, remember that the journey is as important as the destination. Spyglass MTG will work with you to plan and execute your Netezza to Azure journey to meet your business needs.

### The Benefits

Netezza to Cloud offers the potential of so much more than a lift and shift solution.

#### Increase Agility

With the ability to re-envision your analytics capabilities in the cloud you can now:

- Take advantage of cloud agility & scale your platform up and down on-demand
- Adopt modern data platforms like Spark, Hadoop, Azure Databricks, Azure Synapse or Azure Hyperscale.

#### Drive Innovation

The flexibility of the cloud enables you to:

- Develop new skills across your different analyst groups
- Leverage new tools like Power BI, Cognitive Services, Azure ML, Azure Synapse & Databricks Delta.

#### Move from Capex to Opex

- Leverage a pay-per-use model; reduce on-premises costs significantly.
