

Migrating from SAS to Azure

Easily and efficiently migrate your business from SAS to Azure with Spyglass MTG

The Problem

Many organizations still run their SAS applications in-house, having made large investments in hardware, software and infrastructure. However, these SAS deployments are costly and complex to maintain, requiring regular upgrades and special technical expertise to keep pace with changing demands which on-prem solutions can't keep pace with anyway. Therefore, we've seen more organizations looking to move their SAS applications to the cloud than ever before.

The Solution

There are two fit-for-purpose methods to move SAS to the cloud; *Rehost and Reinvent*. They have different cost implications, varying degrees of effort and different benefits.

Rehost: To host again or anew.

An application is moved 'as is' from on-premise to a public cloud service.

We can help you lift and shift your on-prem SAS applications to Azure.

Reinvent: To make over completely.

An application is recreated or written to run on new cloud-native platforms and solutions.

With the ease of access to advanced data platforms, analytics and machine learning (ML) on the Microsoft Cloud, reinventing SAS to Azure can be a fit-for-perfect model.

Spyglass MTG Can Help!

No matter which solution is best for you, we can help make the transition easy & efficient! [Contact us today!](#)

The Benefits

Increase Agility:

With the ability to scale your SAS analytics capabilities up and down as required and integrate big data platforms like Spark and Hadoop, your enterprise can pivot faster than ever before.

Drive Innovation:

The flexibility of the cloud enables you to develop new skills across your different analyst groups, leverage new tools like Power BI, Azure ML and Azure Data Platforms (Synapse and Databricks)

Move from Capex to Opex:

By moving infrastructure services to a pay-per-use model, you can cut on-premises costs significantly. Compute, storage and scale costs are all enhanced on the cloud.

About Spyglass MTG

Spyglass MTG uses proven integration methodologies and expert consultants to build and deploy Microsoft solutions leveraging SharePoint, Azure, Custom Application Development, and Office 365. With regional relationships, knowledge, and local resources at the ready, we're here to help your business succeed.
